WHO SHOULD ATTEND?

This workshop is designed for nurses and other healthcare professionals who care for patients with a stoma and would like to build their knowledge, practical skills and confidence in providing stoma care.

It is particularly suitable for those new to stoma care, returning to practice, or wanting to refresh their skills in the everyday management of patients with a stoma.

WHAT WILL YOU LEARN?

By the end of this practical workshop, you will have a better understanding of:

- What a stoma is and why stomas are formed
- The different types of stomas and their management
- Principles of effective stoma care
- How to prevent and manage pouch leakage
- Peristomal skin care and common complications
- Common stoma products - when and how to use them
- How to safely empty and change a stoma pouch
- Practical approaches to common stoma care scenarios
